

Internet server login details:

The local Web Store Folder where your web results files are stored

C:\Users\Luca Salvadori\Desktop\Acro-Webout\crippa23

Browse

Use the droplist to select your target internet website. You can create multiple logins to upload your results files to different websites and change to the appropriate destination at any time. The droplist options are:

- The ACRO web test folder. You can use this public internet folder to check that the ftp system in your computer is functioning correctly. The location is <https://www.acro-online.net/webtest/> ... etc.
- Your own #1 or #2 website. You must provide the target webserver URI, the Sub-folder, the Username and the Password, then set the port number and the upload method to Active ftp if this is required.
- The CIVA championship that you are scoring. In this case you will require only the password for your championship, which must be obtained before the event from CIVA

When entries are complete use the "Round Trip Test" button to prove that the system functions correctly.

Select the target website for your Results files:

Your website #1

Web server URI: *e.g. folder_name*

www.aeroclubmilano.it

If required, specify -

Port: Active ☐

Sub-folder (if any) *e.g. results, with no slash /. Leave blank to access the server root*

crippa23

Username: [acmusr](#)

Password: [Btd8Tdsj](#)

...

Check that these details are correct and the server responds as expected:
